

**Bentham Crouwel**

**Congress Centre, Amstelveen**

This congress centre and apartment building are part of the new heart of Amstelveen. The congress centre occupies a two-storey basement that locks into the retail area round about. The ten-storey residential tower, which marks the entrance to the new centre, boasts a capacious entrance lobby with a tall glass facade and an underground parking facility for its apartments. The stepped shape of the congress hall can be read in the exterior. Entrance and foyer are tucked below the hall behind the glass facade. The ensemble has a vibrancy that adds to the ambience of the new town square.
